

Ewing Morris Flexible Fixed Income Fund LP (the "Fund") was established in February 2016. The objective of the Fund is to preserve capital for investors through all market environments and achieve 5-7% stable net returns with lower price volatility compared to equity markets. The Fund is unique in its focus on the high yield bond market, utilization of low levels of leverage, and controlling risk through hedging individual bond holdings by shorting the equity of the same company.

STRATEGY

We describe our investment strategy using the analogy of a sport's playbook. A team with only one play can often be stopped, but a championship team will have perfected multiple plays so that they can score regardless of the opposition's strategy.

STRATEGY BREAKDOWN

Credit Maker	40.8%
Structural Value	42.1%
Durable Business	24.4%
Equity Hedge	-6.8%
Hedge (other)	-2.0%

FOUR DIFFERENT INVESTMENT PLAYS:

- 1) **Durable Business** – businesses whose franchise or assets can survive no matter what happens. Assets may be indispensable, have a moat or little exposure to change;
- 2) **Credit Maker** – people or entities whose actions and influence over a company's capital strategy should lead to a favourable credit outcome;
- 3) **Structural Value** – a bond possessing significant protection through its contract or structural qualities; and
- 4) **Equity Hedge** – a direct, risk-reducing hedge where an issuer's equity is much more vulnerable to adverse events than the underlying bond position.
