

Ewing Morris Partners Fund LP (the "Fund") was established by John Ewing and Darcy Morris in March 2019 to achieve preservation and growth of capital through superior securities selection. The Fund dynamically invests in securities of equities and fixed income investment funds managed by Ewing Morris & Co. Investment Partners Ltd., (the "Manager"), namely the Ewing Morris Opportunities Fund LP, the Ewing Morris Flexible Fixed Income Fund LP and the Ewing Morris Dark Horse Fund LP. The underlying holdings within the portfolio will favour growth assets, targeting an equity-leaning balanced portfolio, with the remaining assets in fixed income securities.

Strategy

We describe our investment strategy using the analogy of a sport's playbook. A team with only one play can often be stopped but a championship team will have perfected multiple plays so that they can score and defend regardless of the opposition's strategy.

Risk

We view risk as the chance of permanent capital loss and believe that volatility represents a source of opportunity. We invest when security prices are trading at a significant discount to our estimate of true value. This is designed to provide a margin of safety to protect capital against unexpected events such as economic crises, natural disasters, political events and new technologies. Our goal is to protect and grow our clients' purchasing power over time.

PARTNERS FUND INVESTMENT PLAYBOOK

Offensive Playbook – The Offensive Playbook involves investing in units of the Ewing Morris Opportunities Fund LP which applies a private equity mindset to public company investing. The Opportunities Fund LP employs a long-term investment orientation and invests in a concentrated portfolio focusing on inefficient areas of the public markets. The Fund is geared towards capital preservation and targets a net return to LPs of 10% per annum over time, with lower volatility than the broad-based North American equity markets.

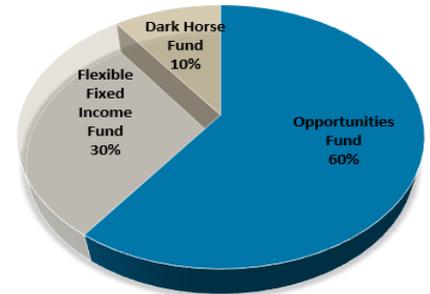

Defensive Playbook – The Defensive Playbook is designed to preserve capital for investors through all market environments, particularly during periods of rising interest rates. This is achieved by investing into the Ewing Morris Flexible Fixed Income Fund LP, which has historically had lower volatility and low correlation with general markets and targets 5-7% net returns per annum over time.

Neutral Zone Playbook – The Neutral Zone Playbook is accessed via the Broadview Dark Horse LP, a low net exposure North American long-short fund focused on small cap companies. The strategy is capital structure agnostic and seeks "equity-like" returns. The investment approach is to look for structural, nuanced or temporal inefficiencies, conduct deep research and pursue company involvement as a back-up plan. Investment opportunities are reviewed through a private market value lens.

The Fund may invest in other funds from time to time which may be managed by the Manager or a third party manager or may invest directly in underlying securities. We determine and may change the allocation to each of the funds from time to time.
